# HSEQ (Health, Safety, Environment & Quality)

The areas of Health & Safety, Environment and Quality Management (HSEQ) cover a diverse and ever expanding variety of policies, processes and related risks.

In many organizations these areas may be managed by separate departments, each with its own language, procedures and IT systems.

For senior executives and directors, this can be frustrating as they try to manage the big picture of compliance and assess where the key priorities for investment are.

Horizon

was developed to address this challenge…
